

*Project: File handling and string manipulation*

A sample script of Game of Thrones was taken from the page and stored in the file [conv.txt](#) in the dataset provided. Your task is to read the file and do the following:

1. Find out the number of unique characters in the sample conversation?
2. Create a new text file for each of the characters with their name and store the unique words said by them in their respective file. Store one word in one line.
